A good book for a beginner.By Curtis J. MareanThis is an exelent little book for someone who wants to build a log cabin. It will explane all the basics to the beginner who is considering building one of these to live or to have a little camp in the woods. It shows you just about all you need to know in order to build one-even if you have allmost no money,a point I myself find quite helpfull,so all you "back to the lander's " should have it on your book shelf. It is plane and to the point and more importantly it willshow you diferent ways to get things underway it was written by a couple who did this themselves and know all the pit falls. I highly recomend it. I am planing to get another copy for my self (mines all worn out!).
