Stunning Photos And Prose Describing The Design And Building Of An Architectural MasterpieceBy Hutt BushAs a fan of architecture, I was eager to see and read this beautiful book. Chateau Des Fleurs is an elegant, exquisitely designed estate in Bel Air, California, designed by renowned architect, William Hefner. His book of the same name allows the reader to learn directly from its designer his challenges and insights in creating the largest home ever built in California when it was completed.During the years of design and construction, Hefner and his clients visited Europe numerous times for inspiration in building an authentic French chateau in the best neighborhood in Southern California. The challenge was to faithfully translate 16th to 18th Century architecture built for French royalty into a 21st Century modern home with every possible luxury and convenience.Hefner gives an insiders view of that process both with artful prose and with detailed photographs of the

building process and the final product of chateau set among several acres of lovely French gardens. The Chateau has separate wings for the husband and wife, a full-size two-story ballroom, grand entrance with staircases and beautiful gardens. Hefner has a reputation for faithfully translating any architectural genre; and Chateau Des Fleurs exemplifies his gift. Reading and viewing this book was a pleasurable, unique experience. Highly recommended! 0 of 0 people found the following review helpful. One Star By CustomerLovely book but not much on details. 0 of 0 people found the following review helpful. Stunning!!! By pinkykris7 This book truly captures the incredible process of building such an exquisite masterpiece. I really enjoyed the stunning photos and being transported into the process of each stage of development. What a wonder that someone gets to call this place home! Bonus: This book looks great on my coffee table and every guest always asks me what it is. Highly recommend!

Chateau des Fleurs is an extraordinary book on one of Bel Air's most fascinating private houses. Exclusive access to one detailed interior of the 2-story mega mansion.

While the architectural narratives might evoke 18th-century royalty, there are many contemporary conveniences, among them 31 bathrooms and four elevators. A beautiful garden is spread out over the formal landscape, just as it would have been on a French estate. (Wendy Goodman Departures, March 24, 2017) About the Author
