By NikkiHi have all of Christopher Lowell's other books and I do love his decorating, but this book was a bit of a disappointment in that it wasn't packed with as many small space tips as I would have liked to target small areas such as corners. This book features 2 mobile homes his team re-did from scratch. The make overs created used similar techniques found in his other books, I was looking for more 'niche' space ideas. Great transformations as usual if you have the tools to build items which I don't. 1 of 1 people found the following review helpful. One can't go wrong with Christopher's books! By George B. As far as I know, I've now purchased every book that he has published. His manner of presentation, light-heartedness and sincerity are all very satisfying! I'd recommend this book to anyone who feels the creative urge to jump in and redecorate... or decorate!!!!!! 0 of 0 people found the following review helpful. Christopher Lowell's You Can Do It! Small Spaces By Linda Bryant Probably the BEST Designer Book I've ever read (and I've read many). He's absolutely fabulous. What he did for that manufactured home was incredible. I've been

looking for a book like this for years. And, by the way, my husband built me one of the "foyers" pictured in his book and it's beautiful and he built it in a day!!!! Bravo !

Christopher Lowell has done it again! In response to thousands of letters requesting a book on small-room decorating, the Emmy Award-winning star of the Discovery Channel's most popular decorating show applies his innovative thinking to the challenge of turning cramped quarters into a comfortable, stylish home. He takes the Seven Layers of Design system introduced in his first book one step further by applying it to small spaces and inspiring readers to create extraordinary rooms out of the ordinary. With his trademark energy and innovation, Lowell guides us through two modular homes, one designed in a traditional style, the other in a more modern decor, but both intended to offer the reader a myriad of design options and ideas. The traditional home features a Nantucket-style master bath, a sunroom with faux stone walls, a French-influenced guest bedroom, and a separate dining room. The modern home contains a kitchen finished in sophisticated stainless-steel paint, a living room-guest bedroom partitioned with sliding bookcases, and a Zen master bedroom with a space-saving platform bed. Room by room, Lowell tackles such problems as how to make the most of tiny master bedrooms, how to create several rooms from one, what to do with narrow hallways, how to conserve space by creating multipurpose rooms, and how to renovate a guest bathroom for under \$100. Before and after pictures show how anyone can perform miracles just by "thinking outside the box." Once again, Christopher Lowell inspires readers to dream big, no matter how small their space.

About the Author Christopher Lowell is the host of The Christopher Lowell Show (formerly Interior Motives), the most popular daytime show on the Discovery Channel. His eclectic background as an actor, artist, classical pianist, creative director, and teacher of interior design has given him both the skills and the authority of someone who has truly paid his creative dues. On his show, Christopher brings his practical experience and talent to people looking for problem-solving ideas. He delights in teaching them to decorate their homes with fabulous projects and improvements that are achievable, affordable, and fun. Loyal viewers tune in twice a day and still can't get enough of Christopher; their response has inspired a line of decorating products and custom paint. As Christopher would say, Love that!
